Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to settle my loan quickly. • I need guidance to negotiate with lenders. • I want to reduce my financial burden.	THINKS • Will the bank accept my ttlement request? • Can AI recommend the best settlement amount? • How can I improve my financial situation?
PERSONA NAME <i>(Role / User Type)</i>	
DOES • Checks outstanding loan details. • Uploads financial information. • Uses AI recommendations before contacting lenders.	FEELS • Stressed because of debt. • Worried about repayment deadlines. • Hopeful that AI can help negotiate a better settlement.
