

Project Initialization and Planning Phase

Date	15 JULY 2026
Team ID	
Project Title	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	Develop an AI-powered platform for borrower registration, financial profile assessment, loan management, settlement prediction, negotiation strategy generation, and financial recovery.
Scope	Covers authentication, loan tracking, AI settlement recommendations, settlement letter generation, analytics, and reporting
Problem Statement	
Description	Borrowers face difficulty managing debts and negotiating settlements due to limited financial insights and manual processes.
Impact	The solution improves settlement success, reduces financial stress, and supports lenders with AI-driven recommendations.
Proposed Solution	
Approach	Use AI/ML to analyze borrower financial profiles, predict settlement opportunities, recommend settlement amounts, prioritize loans, and generate negotiation strategies and settlement letters
Key Features	• User authentication • Loan management • Financial health analysis • AI settlement prediction • Negotiation strategy generation • Settlement letter generation • AI history tracking

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Multi-core CPU
Memory	RAM specifications	16 GB
Storage	Disk space for data, models, and logs	512GB SSD
Software		
Frameworks	Python	Flask
Libraries	Additional libraries	React.js, PostgreSQL
Development Environment	IDE	VS Code
Data		
Data	Source, size, format	Scikit-learn, Pandas, NumPy, SQLAlchemy, JWT
